[REDACTED] Techniques

25X1A

I think that [REDACTED] comments are exactly right and consistent with the objectives which we have established jointly with OPD some time ago. I would recommend that you circulate this paper among GSD people because I think it represents the direction in which our long term thinking should be oriented. Subsequent to that I would like for it to go past [REDACTED] for his edification.

25X1A

I would like your recommendations on whether or not [REDACTED] should be included and the extent to which we direct their study to be compatible with the suggestions indicated here. [REDACTED] knows of our thinking informally. Should we make it more concrete?
